

# FISH MEAL

MIFCO fishmeal is manufactured to the highest standards at our facility on Felivaru Island in the Maldives. It is produced through a refined process of grinding, cooking, and drying fish and by-products from our fish processing operations. This nutrient-rich, high-protein powder serves as a premium supplement feed, formulated from well-preserved ingredients and primarily used in animal nutrition.

## SPECIFICATIONS

	Min	Max
Protein	60%	
Moisture	6%	9%
Free Fat		15%
Ash		20%

**Gross Weight: 25.2kg**  
**Net Weight: 25.0kg**

Our fish meal is 100% suitable for animal feed and is guaranteed free from E. coli, Salmonella, melamine, nitrofurans, chloramphenicol, antibiotics, and genetically modified organisms (GMOs).

Fishmeal is essential in poultry and aquaculture diets, offering high-quality protein, vital amino acids, and digestible energy to support growth and health.
